

# DIETER PANKRATZ

SOFTWARE ENGINEER

## PROFILE SUMMARY

I am a software enthusiast with an electrical engineering background. I learned C as my first language at University to program microcontrollers. I studied full-stack development at Le Wagon in Berlin and graduated with a love for frontend engineering. I love spending time with my friends, reading good books and doing sports. I genuinely love coding, I live to learn, and I get a lot of motivation from working with other people. What can I say? I play well with others. I take things slow, I unpack problems with my teammates and I articulate my own questions and confusions coherently and understandably.

## TECHNICAL SKILLS

- C
- Ruby
- PostgreSQL
- JavaScript
- TypeScript
- GraphQL
- React
- Ruby on Rails

## WORK EXPERIENCE

### Software Engineer • Fulltime

McMakler GmbH (07/2021 - Present)

### Software Engineer • Fulltime

Rockstar Developers GmbH (09/2020 - 06/2021)

- Successfully completed projects for clients from various industries.
- Built UI components with HTML, SCSS, React, Storybook and Jest.
- Collaborated with the designers team to address client concerns and requirements.

### Software Engineer • Freelance

Mozubi App (06/2020 - 09/2020)

- Integrated a React frontend with a Ruby on Rails application.
- Implemented a pricing calculator using React and Ruby on Rails.

### Teacher Assistant • Freelance

Le Wagon Coding Bootcamp (01/2020 - 09/2020)

- Helped Students on daily coding challenges with Ruby, JavaScript, HTML and CSS.
- Taught fundamental concepts of web based development.
- Supported teams from idea to deployment during project weeks.

## PAST EDUCATION

### Mannheim University of Applied Sciences

Bachelor of Science in Information Technology

- In my thesis project I developed an analog capacitive sensor to measure electrical capacities in the range of picofarad.
